

Installation Instructions

To install the ecosys program, please do the followings:

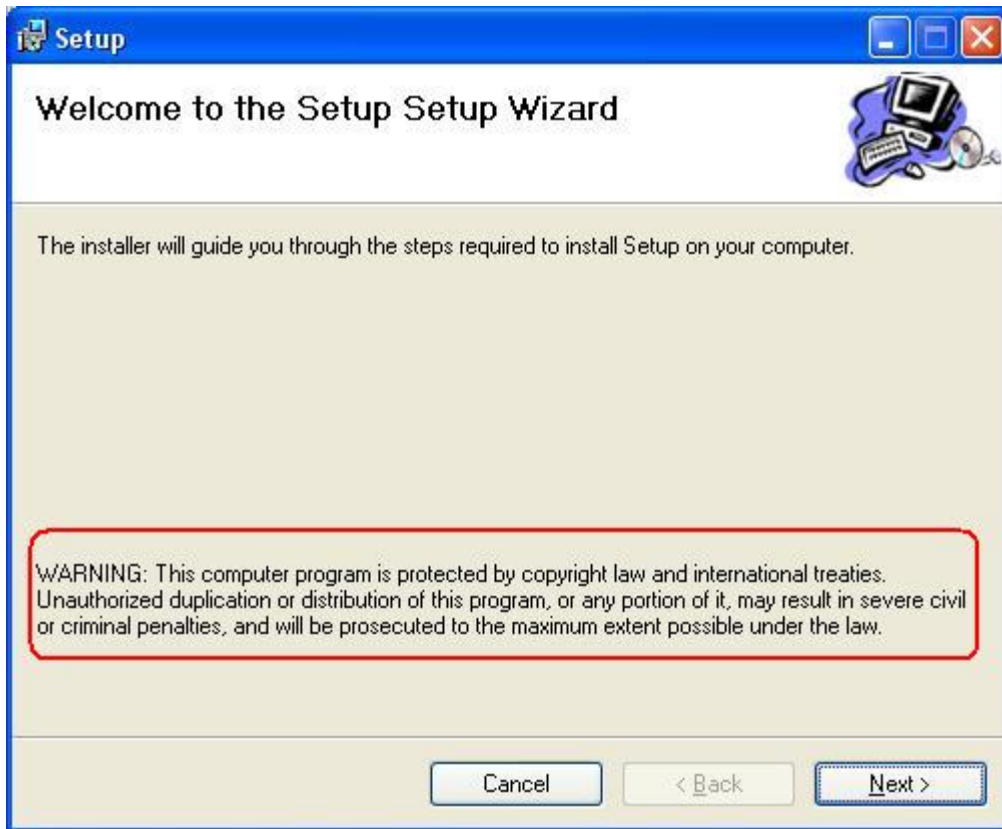

1. Find the location where you stored the **ecosys.zip** file on your computer.
2. Unzip the **ecosys.zip** file using **Winzip**. After unzipping ecosys.zip, you should see the following four files which are **EcosysSetup.msi**, **dotnetfx.exe**, **Setup.exe**, and **Settings.ini**,
3. Double click over **setup.exe** to start the installation process.

The above installation processes are illustrated using the following snapshots

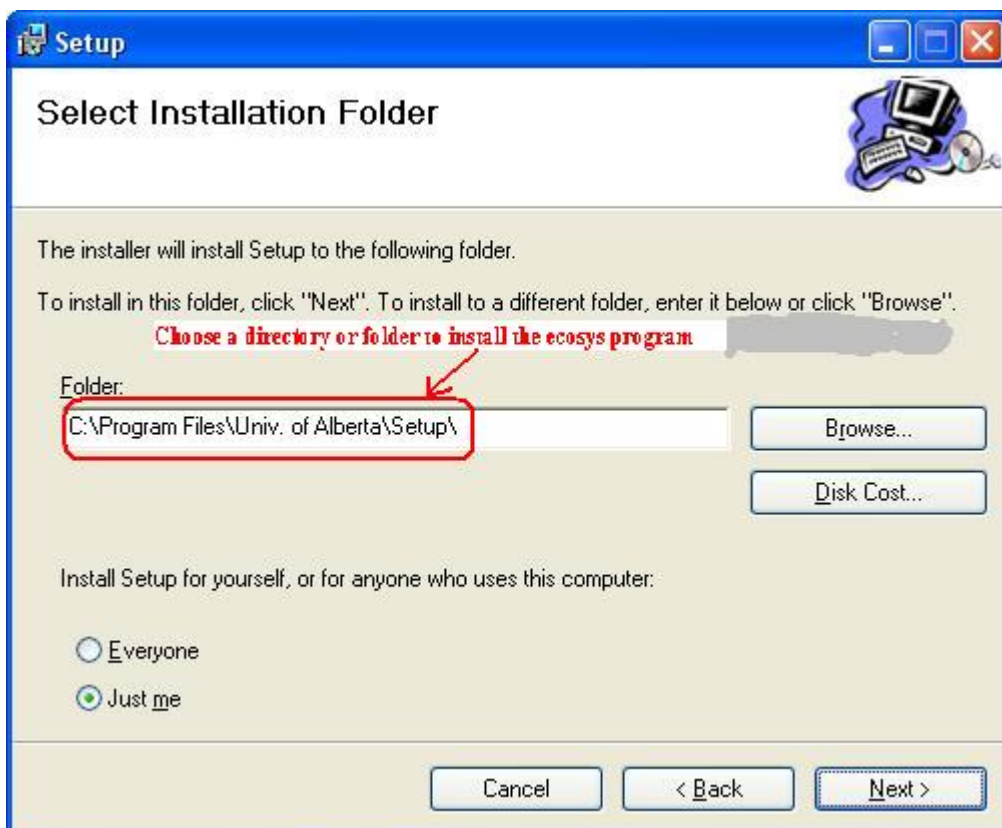

After unzipping ecosys.zip, you will see the following window

After double click over setup.exe, you will see the following window:

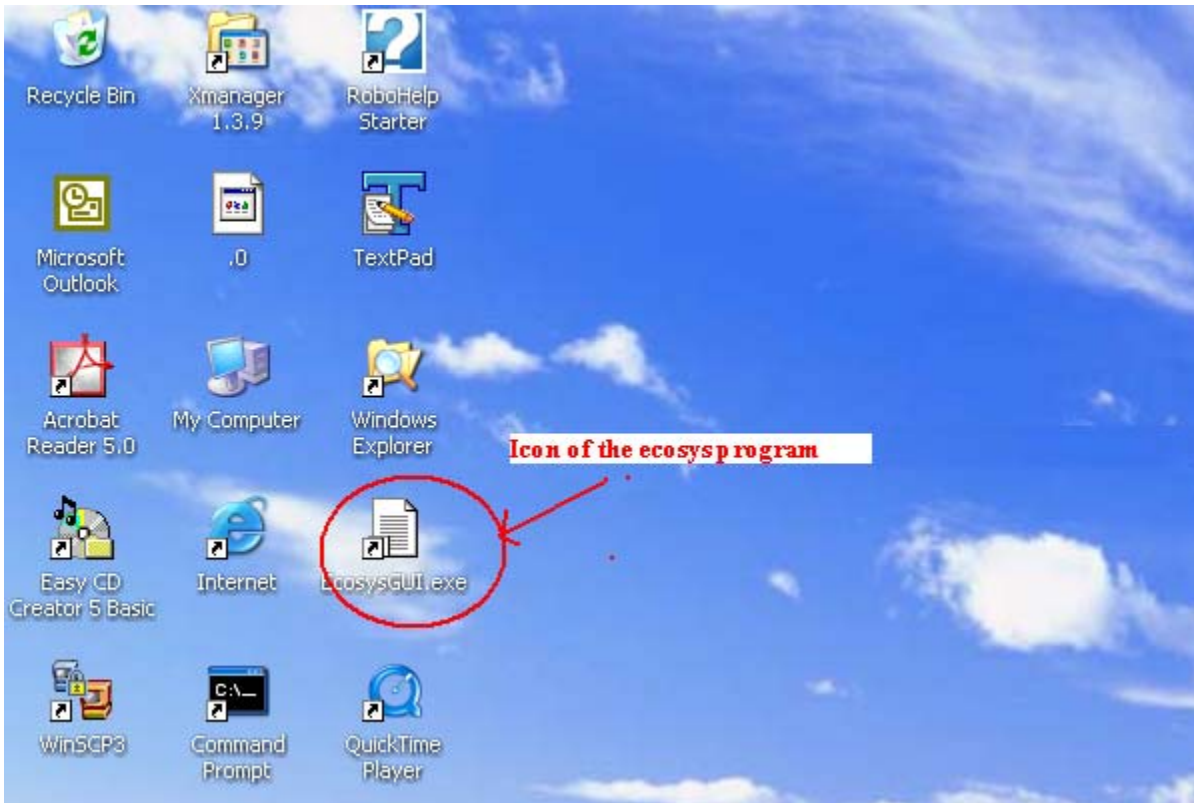

Click the Next button on the above window, you will see the following window where you can specify the location to install the ecosys program.

Continue to click the Next button on the above window, and follow the instructions till the installation is completed.

When the installation is successfully completed, you should be able to see an icon named "EcosysGUI.exe" on the desktop of your computer and an item on your program menu. The latter can be accessed by clicking Start menu on your computer, followed by clicking All Programs menu. For more information, please see the following snapshots

The EcosysGUI.exe icon on the desktop

The EcosysGUI.exe item on the All Programs menu
